Personal Matters/Ex. 6 I was going to do over weekend, but there was a possibility that they were going to ship me out to Shiprock or Farmington to help do data interpretation for the Gold King Mine spill. I had to work over the weekend from my mom's house. I brought my computer with me, since I knew there was a chance that they were going to ask me to "work" to assist the emergency response team on site over near spill area. Our interest for R9 is when the spill finally reached Arizona. It first hits the Navajo, and we have oversight for the Navajo. Was difficult working with Navajo even during the emergency because they are not sharing their data. We provided them everything we had, but it's been a one-way data sharing exercise. **Personal Matters/Ex. 6** Janet
